**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 10, 14- 24, 28- 33, and 37, are drawn to peptide vaccines and compositions, classified in class 424, subclass 186.1.
- II. Claims 11- 13, 25- 27, and 34- 36, are drawn to cell vaccines and compositions, classified in class 424, subclass 93.1.

Inventions I and II are different products. Although there are no provisions under the section for "Relationship of Inventions" in the MPEP § 806.05 for inventive groups that are directed to different products, restriction is deemed proper because the antigen presenting cell (APC) processes or presents the peptide and this will give the APC a specificity that it does not possess without the peptide-epitope composition. The peptide-epitope composition does not possess this specificity. Even though both inventions contain the peptide-epitope composition, they are different products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, search requirements, and classification restriction for examination purposes as indicated is proper.

Additionally, both Invention I and Invention II are generic to a plurality of disclosed patentably distinct species comprising an isolated, prepared epitope consisting of a sequence selected from the group consisting of the sequences set out in Tables VII- XVIII that show a relative binding ratio of 0.01 or higher for at least one allele-specific HLA molecule. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
